

Roth Softline repeater

Roth Softline repeater for use together with the Roth Softline control system.

Description

The Roth Softline repeater is intended to be used as signal amplifier in the Roth Softline system. Roth Softline repeater can be used if there are problems with the signal between thermostats, sensors, smart accessories and controller or between master controller and extension module.

The repeater can handle up to 20 devices.

Technical data

Roth Softline repeater	VVS nr. 466397.400
Supply voltage	230V ~ 50Hz
Maximum power consumption	< 1W
Max. transmission power	25mW
Protection class	II
Transmission Ambient	868 MHz
Ambient temperature	+5°C - +50°C
Ambient Humidity	< 80% RF
Degree of protection	IP20
Approvals CE	2014/53/EU,29/125/EC,2011/65/EU
Transmission range Controller/Repeater	50m
