

Press Release

Worcester, October 2018

Roth UK part of employer-led venture at Havering college

Roth UK is very proud to be part of the Plumbing Centre of Excellence launched at Havering college on the 18th September. This is the first of its kind in London, supported by The Society of Public Health Engineers (SoPHE) and the Chartered Institute of Plumbing & Heating Engineering (CIPHE).

The aim of this employer-led venture is to create and develop a robust and sustainable career path for students with a professional skills set. Roth and leading employers from the industry will support the students and teaching staff in a more practical and effective manner by providing opportunities for CPD and work experience.

Today we already have a shortfall of skilled labour in our sector and with Brexit and the potential closure of borders, it will be even more important to develop home grown talent. Government funding is unlikely to support this skills gap, therefore as an industry we need to collectively invest time and money to secure the next generation of heating and plumbing engineers. We hope the success of this pilot project will generate nationwide interest and course expansion over the coming years.

For further information contact: Market Manager Graham Colin Moore at e-mail: graham.moore@roth-uk.com or telephone +44 (0) 1905 453424.

About Roth UK Ltd.

Roth UK Ltd. sells and markets complete pipe installation and underfloor heating systems in the UK. We are part of the international group Roth Industries in Germany. A family owned and family-run group of 1,300 employees who develop, produce and market our visionary and energy-efficient quality products. Combined with competent support and logistic solutions from our northern European headquarters, Roth North Europe A / S in Frederikssund, Denmark, we are well equipped and stand strong in the UK market. Our ambition is to be the best in the market for floor heating and piping systems for heating and domestic water. With an international perspective and a strong national presence, we develop innovative, competitive and market-oriented systems of high quality.
