

Roth edge strip

Description

The edge strip is used to delimit the contact of the liquid screed to the surrounding construction as well to prevent cold- and sound bridges in accordance with DIN 18 560.

Technical data

- › Reliable avoidance of sound bridges through permanent elastic PE-material
- › High elasticity, good tear resistance, no water uptake
- › 100% free of HFCKW and HFKW
- › Produced without HBCD › Manufactured without HBCD flame retardantMaterial

Technical data		
	Roth ClimaComfort® system	Roth knob panel
Material number	1135003442	7RW1000213
Length (m)	25	25
Width (mm)	5	10
Hight (mm)	50	160
Material	Foam (PE)	Foam (PE)
Termal resistance R (m²K/W)	0,10	0,10
Self-adhesive	Yes	Yes
Cutting help	No	Yes
Suitable for	self-levelling levelling compound	Concrete and liquid screed
